

# Vicinity™ Workstation Screens

- Vicinity™ Workstation Screens, Haven in Parthenon

Autex Acoustics®  
MOMENTUM

## Solace in Open-Plan Spaces

Vicinity™ is a fully customizable workstation screen system that enhances physical and acoustic privacy, creating a sanctuary for productive work.

Available in a range of different mounting options, Vicinity can be used with the Vicinity Workstation Clamps—made from 100% recycled PET from in-house textile waste—or integrated into your own setup for ultimate flexibility.

Customization options for Vicinity include style, width, height, color, and corner details, all of which create a tailored experience for every user.

# Reimagining Waste

Our planet has a growing problem with waste, and with 45-50% of total waste going to landfills coming from construction and demolition, there is an incredible opportunity for positive change. Vicinity Workstation Screens explores this opportunity by recycling in-house waste through a new process we pioneered called RePET. This allows us to create products that have a completely circular lifecycle.

Through the RePET process, we have been able to remanufacture over 72,575 lbs\* of waste into raw materials that can be made into new components like our Vicinity Workstation Clamps.

\*Data calculated as of December 2024 and subject to future updates.

# Vicinity™ Workstation Clamps

The new Vicinity Workstation Clamp is made from 100% recycled PET through a unique and industry-first pelletizing process called RePET. This process transforms in-house waste into pellets, which are injection-molded to make more clamps and product components.

And, because the Vicinity screens and clamps are made from 100% PET, they can be easily disassembled from the fixing screws and recycled through the RePET process again and again, creating a truly circular lifecycle.

#### Features and Benefits

- Delivers excellent acoustic performance
- Highly customizable with a range of options for style, color, dimensions and corner details
- Additional customization options available include Surface Finishes
- Solid color and smooth finish, no capping required
- Innovative mounting clamps are made from 100% recycled PET\*
- Screen are made from 100% PET with a minimum of 80% recycled content
- Easy to install and move when needed
- Low VOC—beneficial for IEQ
- Highly durable, assuring long-term stability and performance
- Tackable surface
- Custom dimension screens to optimize costs
- Carbon neutral product
- Made locally

#### Applications

- Suitable for a variety of workspaces, including: commercial and home offices, classrooms, and libraries

\*Stated recycled content is for clamp components only and does not include fasteners

## Customization

As creators and innovators, we understand your pursuit of the bold and unusual, the rare and exceptional—the brave, color-outside-the-lines ideas. Every space you design is unique, therefore, every element—from floor to ceiling—should be tailored to fit.

Entirely customizable, we embrace an end-to-end collaborative design approach to bring your workstation vision to life. Every screen is made to order with the benefit of custom length panels—fitting your project brief while minimizing waste—and design flexibility.

If your project requires customized screens, please contact your Momentum account manager.

● Vicinity™ Workstation Screens,  
Custom, Sol in Falling Water

# We are proud to be a carbon neutral organization

We have reduced and balanced all carbon emissions from our business operations, including manufacturing to zero.

# We offer entirely carbon neutral products

All our products are carbon neutral with emissions offset through certified carbon credits.

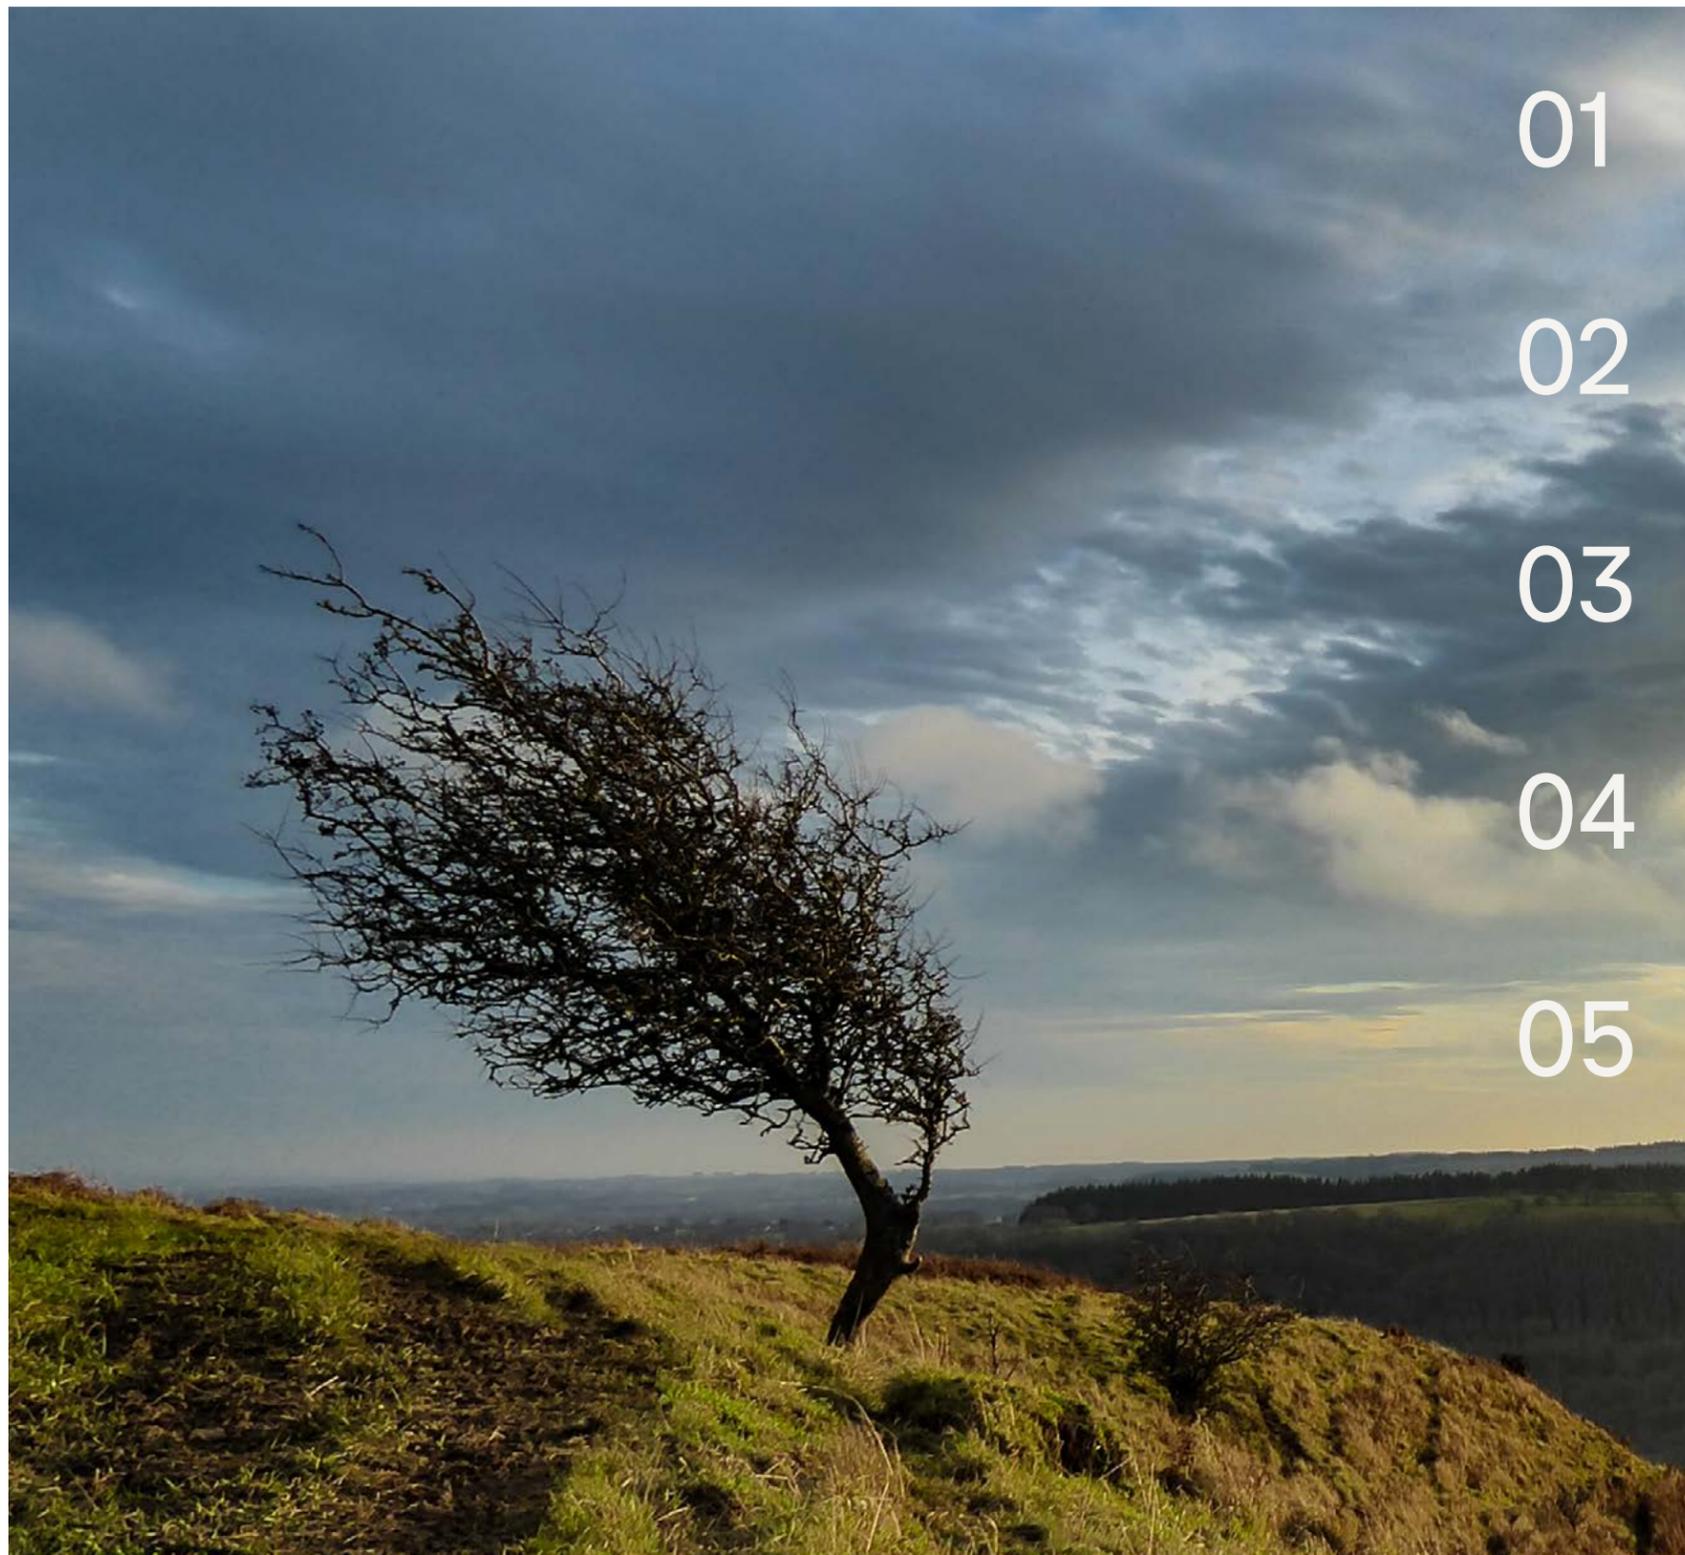

0<sub>t</sub>

CO<sub>2</sub>-e per ton of product

# Sustainability pillars

The five pillars of our sustainability strategy define all aspects of our operations and the products we offer.

01

**Climate change demands climate action** We are carbon neutral in everything we do.

02

**Closing the loop** We are advocates for closing the loop on waste. We design with circularity front of mind.

03

**Sustainable supply chain** We carefully select responsible suppliers and take action to mitigate unethical practices, and encourage good working conditions.

04

**Supporting wellbeing in buildings** All our products are made using only safe materials. No harmful chemicals are present in our products.

05

**Operating a business for purpose and profit** We strive to have a positive impact on our environment, our people, and the next generation.

In everything we do

# Our journey to carbon neutrality

1967

Founded in Auckland, NZ, creating underfelt for the flooring industry

1990

Established on-line recycling

2012

Reclaimed waste trimmings, **reducing raw material use and associated emissions**

2017

First EPD's published and started measuring **greenhouse gas emissions**

2020

Dematerialization project which reduced raw material use **by 30% for core product**

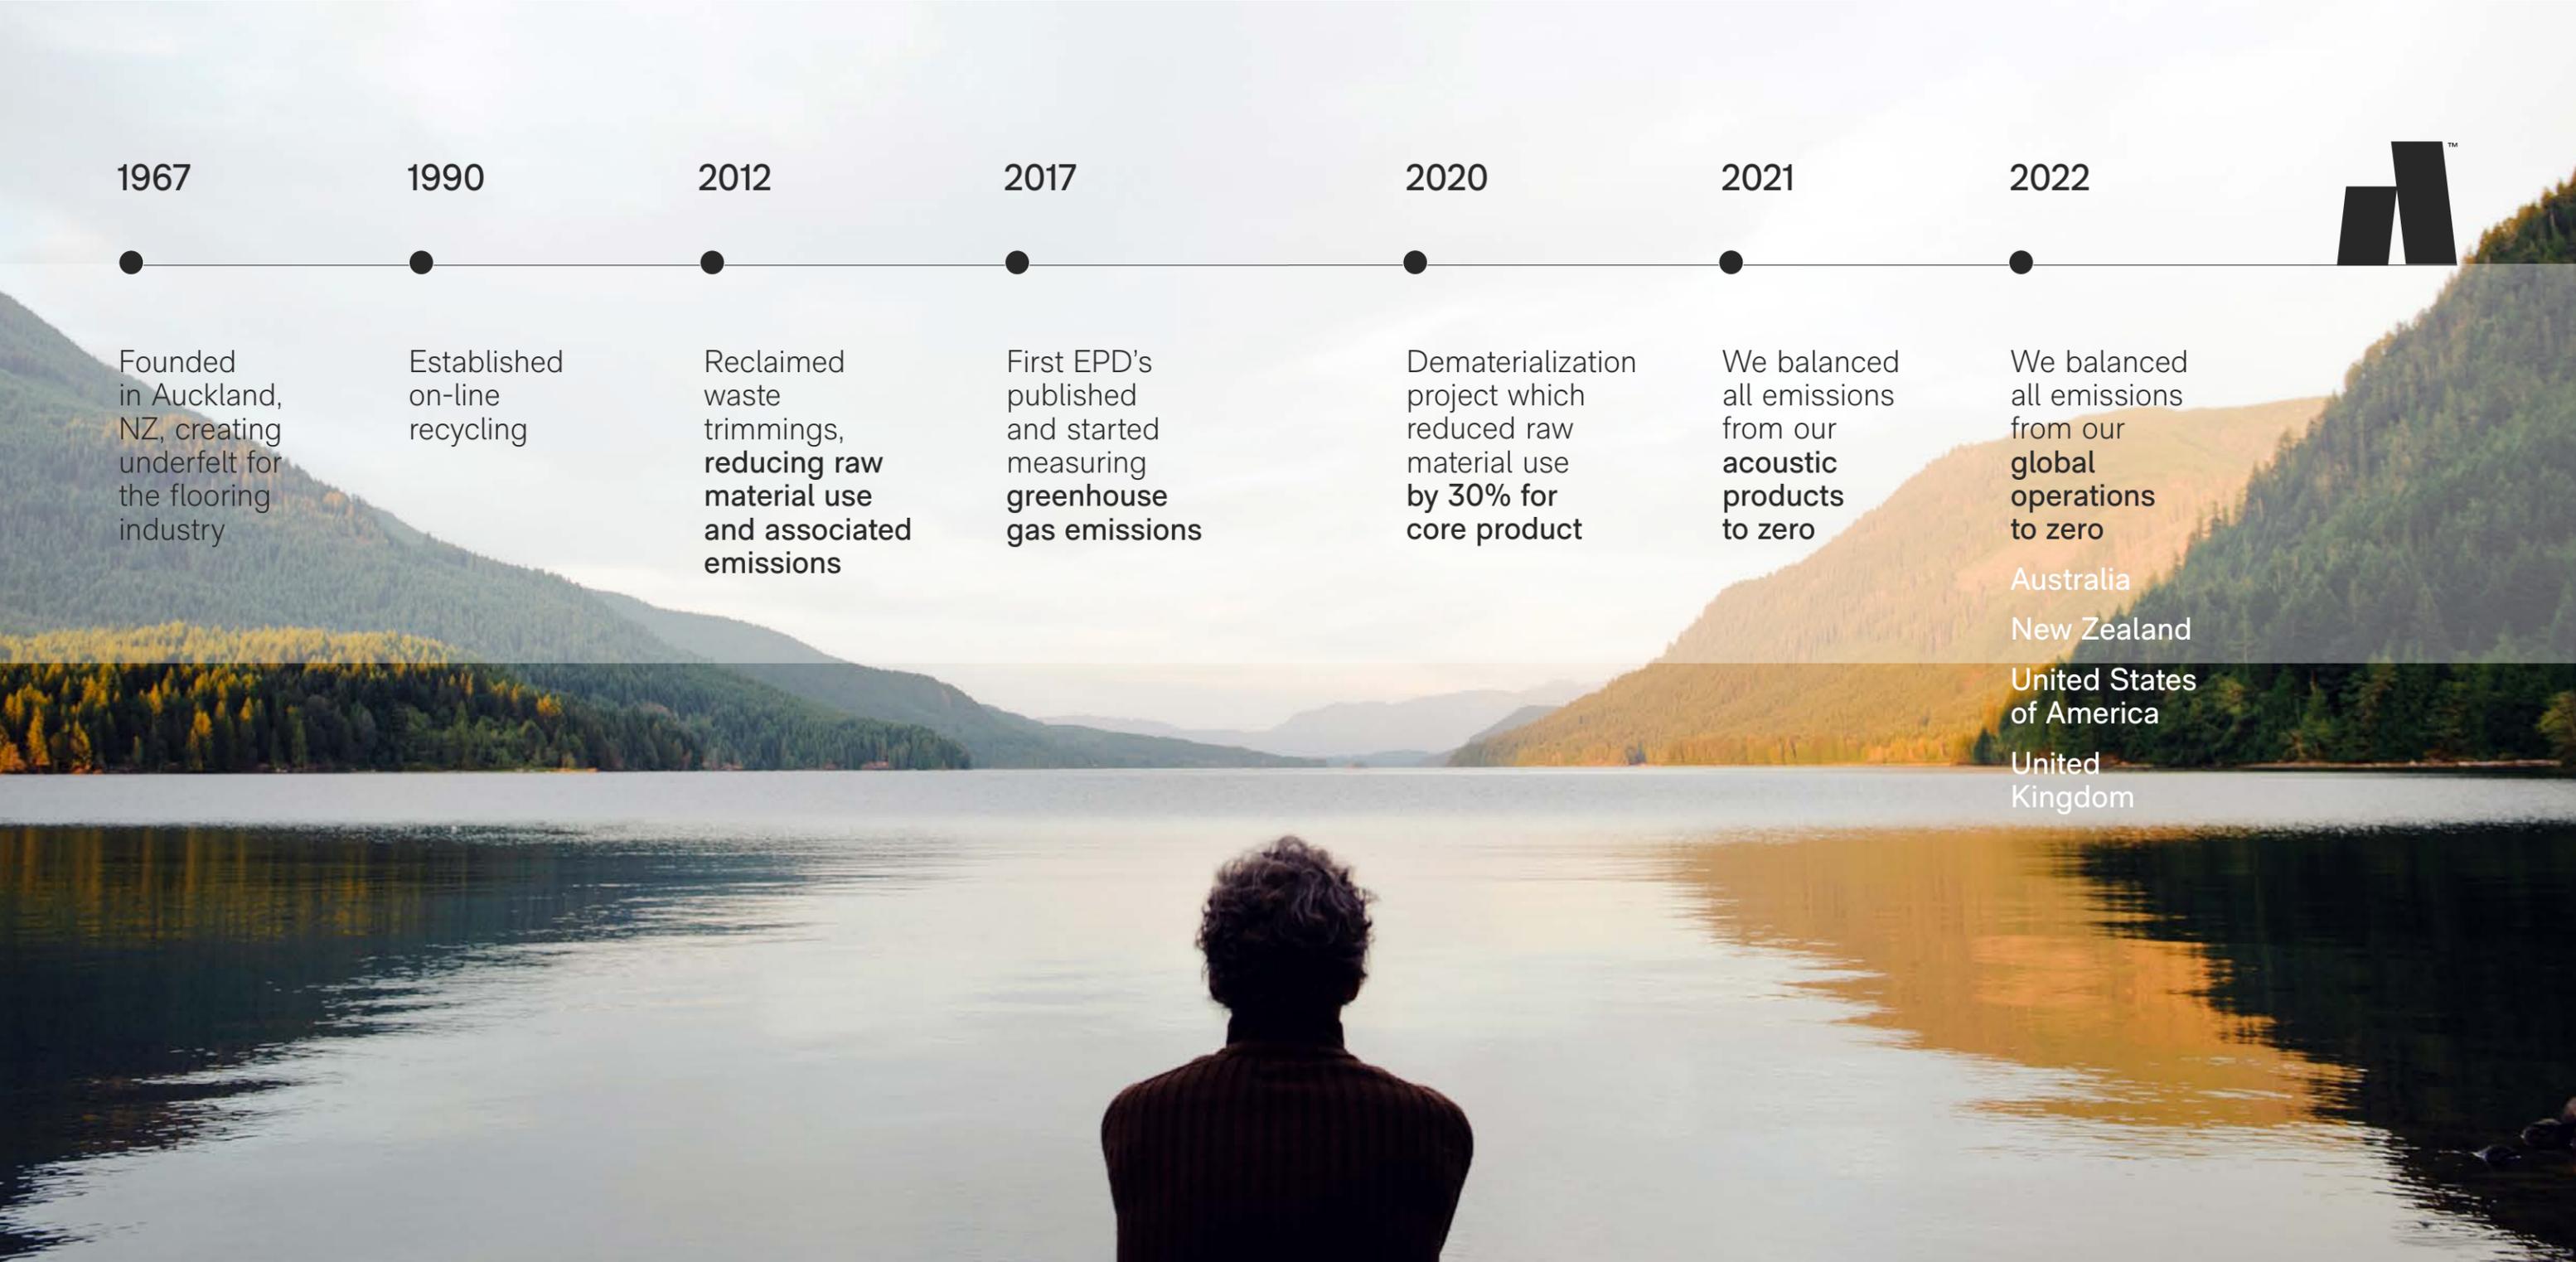

2021

We balanced all emissions from our **acoustic products to zero**

2022

We balanced all emissions from our **global operations to zero**

- Australia
- New Zealand
- United States of America
- United Kingdom

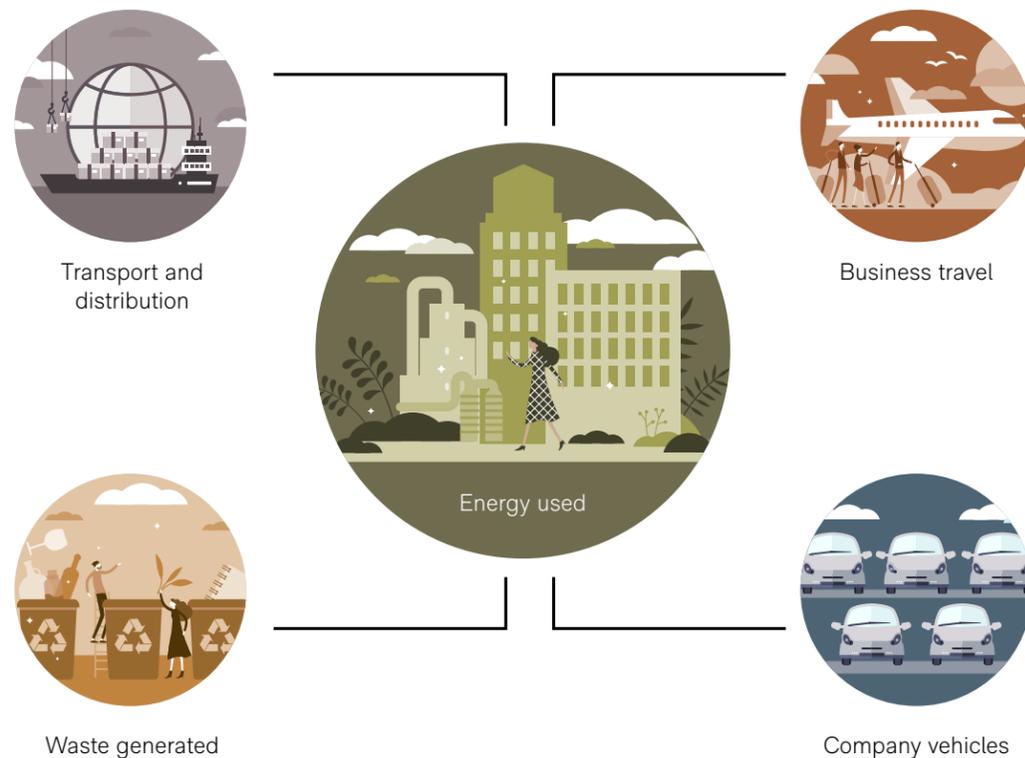

# How we're fighting climate change

The climate crisis is the biggest issue of our generation. As a product designer and manufacturer, we have an opportunity to help improve the carbon impact of our industry.

## Our operational carbon emissions

We are a carbon neutral business. We actively monitor the carbon emissions of our entire operation to better understand our carbon footprint and how we can further reduce emissions. We have an internal strategy to reduce our carbon emissions and have successfully delivered a number of carbon reduction initiatives within our operations. Any carbon emissions that are currently unavoidable are offset through certified carbon credits. We have a commitment to purchase only verified carbon credits that are retired on robust registers to ensure we are driving positive change.

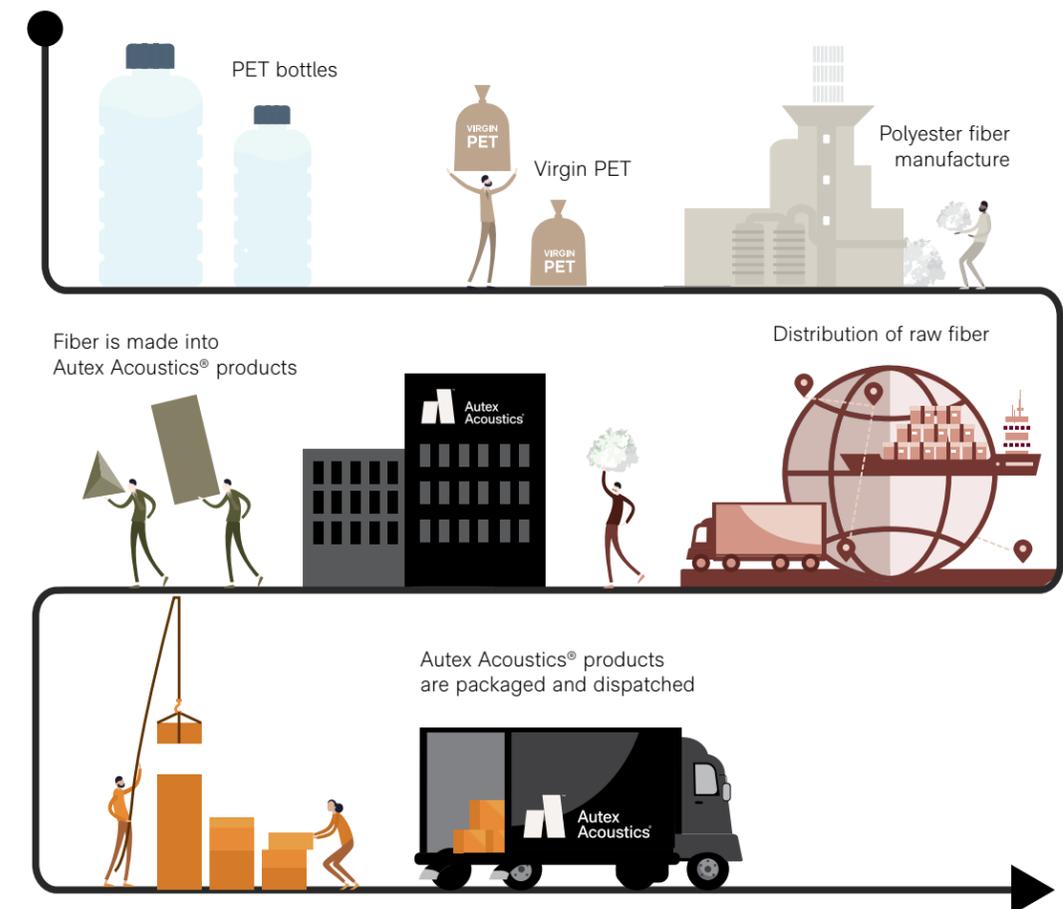

### Key business activities contributing to our operational emissions

## Embodied carbon of our products

Our products are carbon neutral, and we are the first business in our industry to include the cost of carbon in our products. We consider this an investment in present and future generations, and simply a cost of doing business. We calculate the embodied carbon of our products, from the raw material to the manufacturing gate, using industry recognised ISO standards. We have reduced the carbon footprint of our products through smart design and efficient manufacturing. While the embodied carbon of our products is low, they still do have a carbon impact. We mitigate this through our Carbon Neutral Product Initiative by offsetting the equivalent emissions using certified carbon credits. These carbon credits are generated from projects focused on renewable energy and fuel switching around the world.

### Key activities contributing to the embodied carbon of our products

# Credentials

## Certifying your green building

Autex Acoustics products meet criteria for WELL, LEED, Green Star, and BREEAM building rating systems, helping you achieve certification for your project. For support and guidance on available rating system points please visit [www.autexglobal.com](http://www.autexglobal.com), or speak with your Autex Acoustics account manager.

### Mindful Materials

The Mindful Materials library provides transparent information on product environmental certifications and ingredients to help you make informed decisions when specifying. Explore our product range on the Mindful Materials library [mindfulmaterials.com](http://mindfulmaterials.com)

### Environmental Product Declaration

An Environmental Product Declaration (EPD) is a document that communicates information about the life-cycle environmental impact of a product, including embodied carbon. Our EPDs are created and verified in accordance with ISO 14025 and EN 15804, used for construction products and services.

### GreenRate – Level A

GreenRate is a multi-attribute environmental certification that scores products on a range of environmental, health, and social measures. Autex Acoustics products are certified to achieve GreenRate Level A. Level A is the highest GreenRate level and demonstrates the highest level of product sustainability.

### Declare – International Living Future Institute

The ingredients in our products have been reviewed against the Living Future Challenge Red List and achieve a Third-Party Verified 'Red List Free' status.

Products achieve the highest 'LBC Red List Free' status when:

- Ingredients are 100% disclosed and are not found in the Red List
- Products are shown to meet VOC emissions limits

We assure the accuracy of our certifications by having our Declare labels independently verified by a third party expert.

### Health Product Declaration

A Health Product Declaration (HPD) is a document that reports the ingredients of a product and the health effects associated with these ingredients. A Health Product Declaration has been generated for each of our products.

### CDPH Standard

CDPH Standard Method (CA Section 01350) is a widely used standard to evaluate building products for low volatile organic chemicals (VOC) and formaldehyde emissions. All Autex Acoustics products meet the limits set by CDPH and the LEED building rating scheme.

### ISO Certifications

#### ISO 14001 – Environmental Management

Autex Acoustics manufactures under environmental management processes that are ISO certified. This certification gives assurance that we manage any environmental impacts within our operations.

#### ISO 9001 – Quality Management

Autex Acoustics has a strict quality management system that is ISO certified. Robust quality processes from raw material through to product release help ensure our products meet expectations.

#### ISO 45001 – Health and Safety Management

Autex Acoustics manufacturing operations have an ISO 45001 certified Health and Safety Management System to ensure the safety and wellbeing of our people.
